

## District Hospital Physician Training (DHPT) Stanford School of Medicine

DHPT aims to enhance knowledge and skills of doctors to manage common emergency conditions based on current emergency medicine practices in limited resource settings. Doctors serving in public and private health institutions should be competent to manage common emergencies. Care is taken to ensure that skill demonstration, case studies and protocols are relevant to our hospital context. Instructors involved in DHPT program are directly trained by Stanford School of Medicine.

### The course content is as follows:

- Recognition of critically ill patients
- Basic and Advanced airway management
- Basic ECG concepts Basic Chest Radiography
- Shock, Snake Bite, OP Poisoning, Seizures, Stroke Chest Pain, Burns etc
- Primary and secondary survey
- Trauma management

### Methodology:

- Audio-visual classes
